

Table of Contents

Chapter 1 Introduction	1
<i>Terminology</i>	1
<i>Some Interesting Concepts</i>	1
<i>Sensory-deprived</i>	2
<i>Multi-variable</i>	2
<i>No Aerodynamics!!!</i>	3
<i>Who Should Teach Autorotations??</i>	3
<i>Factory Training Schools / Manufacturer's Schools</i>	5
<i>Summary of Chapter 1</i>	7
Chapter 2 Pre-Flight, Hover and Low Speed Training	8
<i>Pre-Flight Briefings</i>	8
<i>New Terms / Limitations</i>	8
<i>Priorities</i>	8
<i>Engine Deceleration Checks</i>	8
<i>Rotor RPM Decay Rates</i>	8
<i>Attitudes - On the Ground and Hover</i>	9
<i>Counting Down to Touchdown</i>	9
<i>No Robotic, Mechanical Control Movements (Please!)</i>	10
<i>Hover Engine Failures</i>	10
<i>Judging Collective Lever Application</i>	11
<i>Falling from 6 Inches Above the Ground</i>	12
<i>Running Landings</i>	12
<i>Hover Taxi Engine Failures</i>	12
<i>Hover Height and the H-V Curve</i>	13
<i>Summary of Chapter 2</i>	17
Chapter 3 Upper Air Work	18
<i>Prior to the Exercise</i>	18
<i>Checks</i>	18
<i>Normal Pre-landing check</i>	19
<i>Leave Yourself an Out</i>	19
<i>Gentle Entry To Autorotation</i>	20
<i>Turns In Autorotation</i>	22
<i>Recovery to Powered Flight</i>	23
<i>Summary of Chapter 3</i>	23
Chapter 4 The Entry to Autorotation	24
<i>When Practicing....</i>	24
<i>Symptoms of Engine Failures</i>	24
<i>Proprioceptive (seat of the pants) Cues</i>	24
<i>Noise</i>	24
<i>Immediate Actions</i>	24
<i>First - Move the Cyclic Aft</i>	24
<i>At the Same Time Reduce Collective</i>	25
<i>Add the Necessary Amount of Pedal</i>	25
<i>Rate of Decay of Rotor RPM</i>	26
<i>Summary of Chapter 4</i>	26
